MOVING FORWARD & MOVING ON

Speak to us about our lifts

At **Felesa**, where quality and excellent service are our hallmark, we specialize in unique projects tailored to the special and specific needs of our clients. Our Technical and R&D&I Departments work together to design and manufacture lifts suitable to your every need.

All **Felesa** vertical transport products and solutions are conceived and designed based around comfort, safety, efficiency and sustainability.

Quality

Manufacturers with over 40 years experience in the field, at Felesa we have a highly qualified team on hand.

Felesa is committed to having a UNE-EN-ISO 9001:2015 based Quality Management System present in all its processes, regularly improving customer satisfaction, and making continuous improvement a means to achieve progress in our processes and establish the route to Excellence in management. The culture at the company is such that we seek the satisfaction of all interested parties. When our clients so require, the products supplied comply with European Parliament Directive 2014/33/EU - for which we have the module H Annex XI (design,

manufacture, assembly, installation and final checks of lifts) and module E Annex VI certificates (checks and inspection of safety components).

The ongoing adaptation of our product ranges to market requirements enables us to expand our designs to products covered by other Directives, as is the case with "FHL" lifts (per Machinery Directive 2006/42/EU) that ensures they are marketed suitably.

2014/33/EU Module E ISO 9001

2014/33/EU Module H BS OHSAS 1801

Felesa (Fabricación de Elevadores S.L.) was founded at the end of the 70s with the aim of designing, manufacturing and marketing lifts in their entirety and their primary components. Nowadays, over 40 years later and having been a pioneer in this business concept, its founding purpose is fully consolidated and more than 40,000 elevators have left the Felesa facilities for a wide variety of clients, countries and end users.

Suitable management of the knowledge acquired and accumulated allows our clients to undertake the most demanding projects with determination, fully supported by

a team that is highly engaged and thoroughly trained.

As a result of its constant effort to adapt to the changing needs of the sector, Felesa can offer the right combination of price, lead time, performance and quality for all our products and services, knowing that these are key factors in ensuring the satisfaction of our clients.

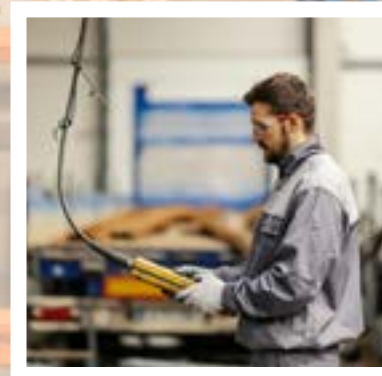

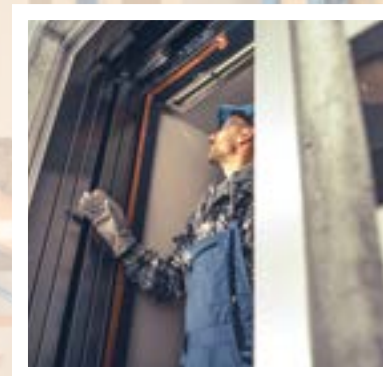

Felesa has specialized in the supply of complete elevators to export markets, offering the highest levels of service and excellent communication with all parties involved in each project.

YOU CAN TRUST OUR TEAM

Our mission is to design and offer vertical transport solutions to professionals and companies in the sector, both in the domestic and export markets, through highly competitive products and services.

Our goal is to create a workspace where the entire Felesa team and its stakeholders can share and promote the values of teamwork, thus achieving sustainable development based on criteria of economic, social and environmental responsibility.

Facilities

Felesa has facilities measuring some 15,000 m², enabling versatility in the manufacture of both complete lifts and lift components.

The company is based in north-east Spain, in Zaragoza, a modern technological city, which is well connected with the main parts of the national industrial network.

Felesa's cutting-edge technology and computerized production processes enable us to ensure the required security and flexibility to meet our clients' needs in terms of both the technical characteristics and quality of the products and the required delivery times

Ongoing investment in an effective information system and management of our production allow **Felesa** to plan and differentiate orders from our clients according to various key parameters and to be on top of operations at all times.

Mission

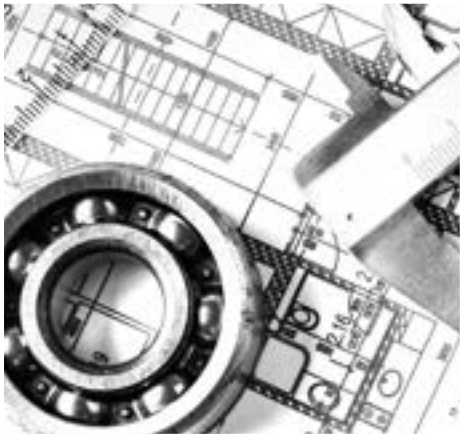

At Felesa we have a vision:
to adapt our lifts to any project, whatever the challenge or requirements.

Felesa works with the leading suppliers and brands in the lift sector, ensuring a product that is reliable and homogeneous in both performance and durability.

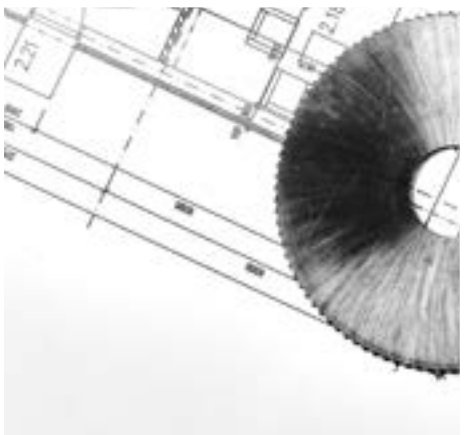

Optimised organisation and our continuous investment in R&D&I and technological developments means our clients can decisively tackle the most unique or special projects fully supported by the highly engaged and thoroughly trained **Felesa** team.

Solutions

Our range of lifts covers most of the different configurations and typologies proposed by clients. We are specialists in developing tailored projects, offering the most complex personalised solutions, with success 100% guaranteed.

Don't have a lift? We'll make you one.

adaptation + space

Renovations,
modernisation,
buildings
without lifts.

Flexible solutions that adapt to any building and space. We can optimise any space no matter how small. Equipped with the most modern energy efficiency systems, they improve and optimise life in buildings currently without a lift. Equally designed to replace old installations to improve safety and adapt them to the new regulations.

You come up with the idea and we'll build it.

creativity + design

Customised

There are unique buildings where exclusivity is a necessary feature. Our custom lifts are designed to meet these needs. Shaping and adapting the creativity and designs of architects and designers. Integration, customisation, perfection and adaptation.

Step into our panoramic lifts, enjoy the view and breathe easy.

vision + future

Panoramic

Lifts for buildings where brightness, transparency and vision are key factors. Exclusive cars: round, square, indoor, outdoor, with glass doors ... Our panoramic lifts ensure you feel free as a bird.

There's no space for a lift? Let us advise you on the solution.

solidity + adaptability

Structures Self-supporting structures designed for the installation of lifts in places where there is no gap with solid walls, or to be attached externally to buildings. Resistant and solid, but aesthetically adaptable. Available in steel plate, colours, stainless steel, glass.

You want
accessibility,
we're streets
ahead.

perfection + safety

Accessible

Designed to cover the mobility needs of the disabled or people with reduced mobility, as well as patients in hospitals, nursing homes, clinics and buildings. In these cases, reliability and safety are of the greatest importance. Targeted, efficient, comfortable and practical.

If you need
to move
goods, then
our lifts are
perfect for
you.

ability + experience

Industrial

Specially designed for industrial buildings, factories, warehouses and material warehouses, where movement of goods and large loads is needed. Equally good for the vertical movement of vehicles. Flexible, versatile, robust and durable. Cars equipped with safeguards that are tailored in dimensions and finishes to the place where they are to be used.

TYPES

photos

We specialise
in developing
concrete projects,
offering the
most complex
personalised
solutions.

We work side-by-side with the client to optimise and advise on the use of spaces in order to provide the client with the best solution. Our engineers have studied the regulatory requirements in depth, reconciling these requirements with the client's needs.

Greening Concept

At Felesa we have energy efficiency solutions that can reduce and optimise lift consumption, through regenerative energy storage systems and the use of green energies.

At **Felesa** we know how to adapt and have a wide range of lifts to meet the most diverse needs. Our commitment to quality and service ensures the process operates smoothly.
